

ELECTRICITY PYLONS – ENERGEX – AUSTRALIA

Recoating of 4 **Energex** Towers with the **ZINGA** stand alone system in June 2007.

Surface preparation was done by Zintec Corrosion solution and the application by **Temco**.

Very easy application, it took only two days for one tower.

A total of 1,290 kg of **ZINGA** was used.

This is the Energex Tower No 1278, located at Woongoolba, halfway between Brisbane and the Gold Coast (SE Queensland).

The other three towers are located on Russell and North Stradbroke Islands.

System:

ZINGA 2 x 90 µm DFT
