

STORAGE TANK – BREWERY KBL LTD – BOTSWANA

Customer: **KBL Ltd**
Type: Brewery
Location: Gaborone Botswana

Date: May 2008

Application: Free standing hot water tank 10 m height x 4 m diameter – clad with outer cover of riveted galvanized sheets.

Problem: The galvanized layer was deteriorating, and severe rust was evident in some areas.

Options: The customer was in process of deciding whether to attempt sandblast and painting at considerable cost.

Application of **ZINGA**: Surface preparation by means of wire brush. Rinsing with extra attention to heavily scaled areas. Brush application in two layers with 3 m²/Kg per layer.

Result: Easy **ZINGA** application and the appearance was to customer satisfaction. The customer will now start to repair other galvanized surfaces as well.

System:

ZINGA

2 x 60 µm DFT
