

**ABU QIR FERTILIZERS Co. - EGYPT**

Lettre de recommandation du 5-05-2005 de la société **Abu Qir Fertilizers Co.** confirmant qu'ils utilisent le **ZINGA** depuis les dernières 3 années sur des endroits très corrodés et que le **ZINGA** possède des propriétés galvanisantes.

Ils confirment que le **ZINGA** leur a donné entière satisfaction, ce qu'ils n'ont pas pu trouver avec d'autres produits même avec de la galvanisation à chaud.

**Abu Qir Fertilizers Co.**

**To whom it may concern,**

Abu Qir Fertilizer Company is specialized in Urea and ammonia fertilizers, in addition to the location at bay of Abu Qir created a very corrosive media for the steel structure.

We have tried Zinga coating system in different highly corroded locations for the last 3 years and we have found out that it has galvanization properties where we found no trace for rust or pitting corrosion inspite of the harsh corrosive media. Zinga gave us very satisfactory results which we didn't find with any other product even Hot Dip Galvanization.

Thanks to Los Amigos who presented us this product.
