

UNDERGROUND PIPELINES – GASCO – EGYPT

System:

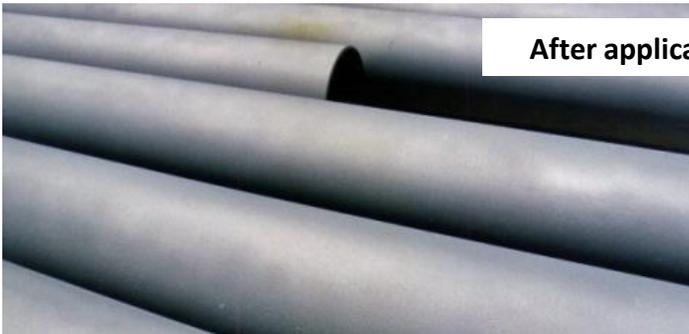

ZINGA	1 x 120 µm DFT
Miocoat International Paint	1 x 50 µm DFT
Coal Tar Epoxy Int. Paint	1 x 100 µm DFT

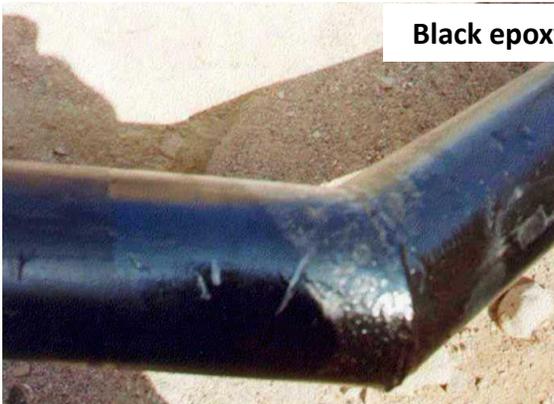

The **GASCO** Company of Alexandria has chosen **ZINGA** to replace the conventional galvanic protection systems for the underground pipelines. The application happened in 2000. These pictures were taken before, during and after the application of **ZINGA**. On some pictures you will see that the **ZINGA** has been topcoated with a black epoxy tar paint.

Airless spraying of ZINGA

After application of ZINGA

Black epoxy tar topcoat
