

## COOLING TOWER BASINS - GREECE

In 2011, **ZINGA** was applied on the inside of water basins at a new factory in the Aspropyrgos Industrial Area (Athens, Greece).

In total 2 water basins, reservoirs for cooling towers, were coated with 2 layers of **ZINGA** to protect them from corroding in the harsh high humidity climate.

The application was done by the **SYCHEM SA**.

**System:**

Surface preparation:

SA 2,5 and Rz 50-70µm

ZINGA 2 x 60 µm DFT
