

REBARS – LAMU PORT – KENYA

The Kenya **Lamu Port** is the gate way for Southern Sudan - Ethiopia Transport Corridor (LAPSSET). This is also known as the Lamu Corridor. It is a transport and infrastructure project in Kenya that, when completed, will be the country's second Transport Corridor. Kenya's other transport corridor is the Kenya Mombasa Port which connects Uganda, Rwanda, Burundi, Sudan and other landlocked countries through Nairobi to the coast of Kenya.

At this point, about 3 Tons of **ZINGA** have been applied in 40 µm DFT on 350 Tons of rebars.

System:

ZINGA
