

## TNB PYLONS – SELANGOR – MALAYSIA

**TNB - Tenaga Nasional Berhad** – is the national Electricity provider of Malaysia and the largest power company in Southeast Asia. It serves over 60 million customers. TNB's core activities are in the generation, transmission and distribution of electricity. Other activities include repairing, testing and maintaining power plants, providing engineering, procurement and construction services for power plants related products.

In 2012, 15 towers of 275 kV overhead lines , that are in the Selangor State, have been re-galvanised with **ZINGA**.

The owner is **TNB - Tenaga Nasional Berhad**.

Since then, **TNB** is still using **ZINGA** as the main product for rehabilitation and/or repair of worn or corroded electricity & high-tension pylons.
