

SHELL PETROCHEMICAL COMPANY - NETHERLANDS

The head office of the well-known petrochemical company **SHELL** confirmed that Shell has no objection against the use of **ZINGA** for their offshore and onshore installations. This is a copy of the e-mail that we received on 21/08/03.

21st August 2003

Dear Mr Willemot

Painting and coating within the Shell Group are normally carried out in accordance with our standard technical specifications:
DEP 30.48.00.31-Gen., "Painting and coating of new Equipment",
DEP DEP 70.48.10.10-Gen., "Maintenance Painting".

These documents specify painting and coating systems quoting generic products. We do not have a formal qualification system in place for the approval of specific products.

This message is to confirm that, if there would be a question regarding the compliance or applicability of any Zinga systems or products for painting and coating work to be carried out under these specifications or under other local Shell specifications, the principal and/or the applicator may seek advice from "Materials Engineering Services" in Shell Global Solutions International, Amsterdam.

They can be contacted through the phone numbers or e-mail below or through the secretariat at +31 20 6203050, fax +31 20 6302989.

Regards,

Gerard van der Schot
