

NATIONAL GRID CORPORATION - PHILIPPINES

In 2006, the **National Grid Company of the Philippines** (named TRANSCO until 2009) used **ZINGA** to repair their old worn galvanised structures.

More than 1000 kg of **ZINGA** was used on repairing high tension pylons within the Visayas region.

The NGCP tower on the right picture was protected with **ZINGA**.

The EDC tower on the left had not (yet) been protected with **ZINGA**.

Surface preparation:
Thorough decontamination
of old hot-dip
System:
ZINGA 1 x 60µm DFT
