

## MÂTS DE TRANSMISSION – ENERGOPROJECT – QATAR

Ceci est une lettre de témoignage de la société **Energoproject** du 27-05-1998, adressée au **Ministère de l'Electricité** concernant les avantages du film galvanisant **ZINGA**, non seulement pour des retouches d'ancienne galvanisation mais également pour le traitement des tours de transmission neuves.

ZINGA FILM GALVANISING SYSTEM ✓  
RECOMMENDATION FOR APPROVAL

Dear Sir,

This refers to Al-Ghorairi & Partners Industrial division, letter ref. no. AG/bh/841 dated 4<sup>th</sup> May, 1998, and their respective letter addressed to you, ref. no. AG/bh/122 dated 1<sup>st</sup> March, 1998.

Having reviewed submitted documents and based on our actual experience (please note that this material has been already approved for touch - up painting of steel towers - Lot 9001) we have the pleasure to recommend use of this galvanising system for the MEW projects having in mind all the advantages already mentioned by the Supplier/Manufacturer.

However, we wish to point out only two of the advantages which we consider very important in a work practice:

- Easy application on the big size elements, which are not suitable for the standard type galvanising, like a crane beams etc.
- Due to non existence of the galvanising plant in Qatar, a possibility to perform the painting works, either in workshop or in situ, gives an advantage both in time and cost saving.

We hope this will help you to make a proper decision in this regard.

*see above for your information*

*Michel Kanaan*  
17/06/98

Yours faithfully,  
*Slobodan Petrovic*  
Slobodan Petrovic  
Director
