

## CRASH BARRIERS - R1 EXPRESSWAY – SLOVAKIA

The R1 is an Expressway in Slovakia, which connects the cities of Bratislava, Trnava, Sered, Nitra, Žarnovica, Žiar nad Hronom, Zvolen, Banská Bystrica and Ruzomberok. Originally it was planned as Highway D65, but after the rejection of the highway category D22,5 in 1999, this was changed to an Express road. The total length is 262 km.

In 1995, the old hot dipped crash barriers at the Dovalovec bridge were reloaded with **ZINGA**.

In 2013, **18 years after ZINGA application**, a quality control confirmed the excellent state of the **ZINGA** application.

Surface preparation :  
High pressure water cleaning

ZINGA 2 x 40 µm DFT
