

SILOS – RED BULL – THAILAND

In October 2008, the **RED BULL** company decided to repair and protect the inside of their silos using **ZINGA**.

These silos store the wheat for the production of whisky.

In total, the inside of 6 silos were Zingalized.
(each having an inside surface of 700 m²)

Inside of silo before **ZINGA** application

Surface prepared
and stripe coated
with **ZINGA**

After **ZINGA** application

System:

Surface preparation:

Full blast to SA 2.5 and Rz 50-70µm

ZINGA 1 x 60 µm DFT
