

LIGHT POLES – DON MUANG HIGHWAY – THAILAND

At the end of 2008, 50 previously galvanised light poles along the Don Muang Highway have been protected with **ZINGA**.

Because the customer **BANGKOK EXPRESSWAY PUBLIC LTD (BEPL)** was happy with the result, they decided that another 549 light poles should be repaired with **ZINGA**, starting in 2009.

As **BEPL** experienced a very easy application and an excellent protection against corrosion they decided to protect another 2400 light poles with **ZINGA** in 2010.

System:

ZINGA

1 x 40 to 70 μm DFT
