

STEEL PILES JETTY – LAVRIO PORT – GREECE

In 2007, **ZINGA** was applied on the jetty construction at the **Lavrio Port** (near Athens, Greece). In total 81 steel piles, which now support 2 jetties, were treated with 2 layers of **ZINGA** to protect them from corroding in the harsh marine climate.

SYCHEM S.A. provided, and verified by test coupons, the application of **ZINGA** for the Greek contracting company **Konstandinidis SA**.

System:

Surface preparation:

SA 2,5 and Rz 50-70µm

ZINGA 2 x 75 µm DFT
