

ANALABE BRIDGE – MINISTRY OF PUBLIC WORKS MANAKARA – MADAGASCAR

Maintenance work on the **ANALABE bridge** on behalf of the **Ministry of Public Works** and the following work by the company OTI: preliminary study, removal and installation of metal parts, transportation of these parts, sandblasting and painting of the bridge.

Where an application by roll was not possible, a brush was chosen.

The bridge is located on the edge of the city of Manakara, Vatovavy Fitovinany region, in Madagascar. OTI was responsible for dismantling the bridged parts of the bridge. These were replaced by new pieces (welded and bolted).
