

## CHERNOBYL NUCLEAR POWER STATION – VINCI – UKRAINE

**ZINGA** is the one material that meets the high and strict requirements of the **Chernobyl Nuclear Power Station** for anti-corrosion protection. In 2002 **ZINGA** was used for the repair of welds as well as transportation and assembly damages of various steel structures. Starting from October 2003, more anti-corrosion protection works were planned, namely on the platforms and grid walks of the nuclear waste tanks. The general contractor for the works is the French Group **VINCI SA**.

Surface preparation:  
Manual cleaning and roughening

System:

ZINGA      120 µm DFT
