

GREENHOUSES – EDEN GREENHOUSE – CORNWALL – UK

The **Eden Greenhouse project** is a botanical / biological theme park in St. Austell, Cornwall. It is the biggest greenhouse in Europe for plants and insects from tropical countries. The constant heat and humidity were the reasons for choosing HDG and **ZINGA** instead of conventional paint systems. Opening date: 1 June 2001.

For aesthetic reasons, **ZINGA** was overcoated with a vinyl aluminium paint. **ZINGA** was used to repair the HDG layer (damaged during transport and assembling).

System:

ZINGA (on HDG) 1 x 60 µm DFT
Vinyl Aluminium Paint
