

FURMANITE – ROYAUME UNI

Ci-joint fax de la société **FURMANITE** du 9 janvier 2001 adressé à la société Bon Accord au Royaume-Uni, concernant l'utilisation du **ZINGA** comme protection anti-corrosion pour les applications en contact avec de l'eau potable dans leur usine **CARLISLE**.

En particulier, le fait que **ZINGA** soit un produit permettant de gagner du temps est important pour le client.

ZINGA COATING.

Bill,

The ZINGA is going well. We have been using it, at our Carlisle factory, instead of nylon coating for drinking water applications. This has meant Aero can supply a coated enclosure with a considerable time saving between finishing fabrication/machining and being delivered to site

However, I do need a Material Safety Data Sheet for it so I can finish off the COSHH assessment for this material.

Please can you supply me with one?

Regards
For Furmanite International Limited

Dominic Dean
