

TANKS & PIPELINES – CIBELES – URUGUAY

Compañía CIBELES SA specializes in the technical assistance and the distribution of products destined to human and animal health & consumption. **CIBELES** has 14.000 m² of industrial facilities on 34 ha of land, including plants for the creation of pesticides, veterinary products and alimentary supplements and water treatment plants. **CIBELES** serves the domestic Uruguayan market and export products throughout South-America.

A **ZINGA + ZINGACERAM PU** coating system was applied in 2012 on a line of tanks located 10 km off the coast. All outfitting including the pipelines were protected with **ZINGA**. The following year another line of tanks was coated with the same system. The supporting structures for a water tank were also protected with **ZINGA**.

6 years after the ZINGA application, in 2018, the structures were inspected and were still found in perfect condition.

Surface preparation:

Blasting to Sa 2.5

System 1:

ZINGA	60 µm
ZINGACERAM PU	100 µm

System 2:

ZINGA	2 x 60 µm
