

SIGNAGE GANTRIES – BRIBIE ISLAND – AUSTRALIA

In 2010 **Queensland Main Roads** specified **ZINGA** for two new signage gantries on Bribie Island Road. The gantries are 18 and 26 meters in length. **ZINGA** provides comparable protection to hot dip galvanizing without size constraints, also minimizing post fabrication transport requirements. The application was done by **Neumann Contractors**.

Surface preparation:
Grit blasting to SA 2,5 and
Rz 50-70µm

System:

ZINGA 2 x 90 µm DFT
